

Commodity Futures Trading Commission

§ 4.12

(h) *Trading manager* means, with respect to a pool, any person, other than the commodity pool operator of the pool, having sole or partial authority to allocate pool assets to commodity trading advisors or investee pools.

(i) *Major commodity trading advisor* means, with respect to a pool, any commodity trading advisor that is allocated or is intended to be allocated at least ten percent of the pool's funds available for commodity interest trading. For this purpose, the percentage allocation shall be the amount of funds allocated to the trading advisor by agreement with the commodity pool operator (or trading manager) on behalf of the pool, expressed as a percentage of the lesser of the aggregate value of the assets allocated to the pool's trading advisors or the net assets of the pool at the time of allocation.

(j) *Break-even point*—(1) Means the trading profit that a pool must realize in the first year of a participant's investment to equal all fees and expenses such that such participant will recoup its initial investment, as calculated pursuant to rules promulgated by a registered futures association pursuant to section 17(j) of the Act; and

(2) Must be expressed both as a dollar amount and as a percentage of the minimum unit of initial investment and assume redemption of the initial investment at the end of the first year of investment.

(k) *Draw-down* means losses experienced by a pool or account over a specified period.

(l) *Worst peak-to-valley draw-down* means the greatest cumulative percentage decline in month-end net asset value due to losses sustained by a pool, account or trading program during any period in which the initial month-end net asset value is not equaled or exceeded by a subsequent month-end net asset value. Such decline must be expressed as a percentage of the initial month-end net asset value, together with an indication of the months and year(s) of such decline from the initial month-end net asset value to the lowest month-end net asset value of such decline.¹ For purposes of §§ 4.25 and 4.35,

a peak-to-valley draw-down which began prior to the beginning of the most recent five calendar years is deemed to have occurred during such five-calendar-year period.

[46 FR 26013, May 9, 1981, as amended at 49 FR 8225, Mar. 5, 1984; 60 FR 38182, July 25, 1995; 66 FR 53522, Oct. 23, 2001]

§ 4.11 Exemption from section 4n(3)(B).

The provisions of section 4n(3)(B) of the Act shall not apply to any commodity pool operator or commodity trading advisor that is registered under the Act as such or that is exempt from such registration.

§ 4.12 Exemption from provisions of part 4.

(a) *In general.* (1) The Commission may exempt any person or any class or classes of persons from any provision of this part 4 if it finds that the exemption is not contrary to the public interest and the purposes of the provisions from which the exemption is sought.

(2) The Commission may grant the exemption subject to such terms and conditions as it may find appropriate.

(b) *Exemption from subpart B for certain commodity pool operators.* (1) Any person who is registered as a commodity pool operator, or has applied for such registration, may claim any or all of the relief available under paragraph (b)(2) of this section if:

(i) The pool for which it makes such claim:

(A) Will be offered and sold pursuant to the Securities Act of 1933 or pursuant to an exemption from said Act;

(B) Will generally and routinely engage in the buying and selling of securities and securities derived instruments;

(C) Will not enter into commodity futures and commodity options contracts for which the aggregate initial margin and premiums exceed 10 percent of the fair market value of the pool's assets, after taking into account unrealized profits and unrealized losses on any such contracts it has entered into; *Provided, however,* That in the case of an option that is in-the-money at the time

to-valley draw-down lasted from April to August of 1992 and resulted in a twenty-five percent cumulative draw-down.

¹For example, a worst peak-to-valley draw-down of "4 to 8-92/25%" means that the peak-
